FLUIDOS KICK-OFF MEETING IN TURIN

Between September 6th and 8th 2022, **FluidOS**, the European Research and Innovation Action project, kicked off in Turin, Italy. The kick-off meeting was hosted at the University of Politecnico of Turin.

During the 3 day meeting, the project partners discussed the technical developments of the **FluidOS** project and community-building actions. The consortium exchanged on a few key areas of development, including moving the gravity outside the data centre through

automation and cross-integration, leveraging from open source software, algorithm and artificial intelligence, and a zero trust paradigm for security.

As a result of the kick-off, **FluiDOS** is keen to ensure that the research and development outcomes will enable the emergence of a multi-stakeholder market of edge services and apps crucial to ensuring a European digital autonomy that is safe, open source, and innovative.

FLUIDOS AT THE IEEE FUTURE NETWORKS WORLD FORUM IN MONTREAL

Dr Antonio Skarmeta, Full Professor, Department of Information and Communication Engineering, **University of Murcia**, presented the FluiDOS concept and vision at the IEEE Future Network World Forum in Montreal on 12 October. During Dr Antonio Skarmeta's keynote speech at **Symposium on Security for 5G and Future Networks**, he spoke about how FluiDOS aims to address dynamic security and zero trust computing in the future of distributed processing nodes.

During the conference, FluiDOS was also mentioned in the session on "**Dialogues between B5G and Vertical Domains: Working Cooperatively for Sustainability**", relating to the need to design solutions that are carbon-energy aware in the context of the future generation of networks.
