

Unveiling FLUIDOS Open Calls

a MetaOS spanning IoT - Edge - Cloud Continuum

UNVEILING FLUIDOS OPEN CALLS

What are Grants?

Cascade funding, FSTP, Subgrant – money distributed from an EC financed European project to third parties for specific task or activities within the project goals.

In FLUIDOS, Open Calls play an important role in developing the technology and validating the platform. In the 2nd round, FLUIDOS will provide financial support through Use Case grants.

These are available for both individual applicants and small consortia (up to three entities), with a max grant of €120,000. Awarded with obligation/contract to undertake specific work set out in application and reporting back to project.

Practical Details

- Applications are done via the FLUIDOS Open Call platform
- Deadline is 4th October 2024 – 17.00 CEST.
- What is needed to apply?
 - Application form
 - Declaration of Honour
 - SME declaration (if an SME!)

FLUIDOS Champions

Project Partners who are able to support application process

1. Apply online via the form
2. Partner can check your application proposal and offer advice (one time) on how to align it more closely with FLUIDOS system and goals
3. Only available once confirming that you've read the publications/deliverables

Advice for Applying

- Read the papers and deliverables on the Open Call page and the FLUIDOS Website – it will help with understanding the technology and the goal of the FLUIDOS system
- Use the evaluation criteria to help construct your answers for the application
- Need to demonstrate the value of the FLUIDOS system – how does it help? What can it let you do differently/better? Why do you need FLUIDOS?
- In this vein, check the existing Use Cases and pilots – duplicating something that is already being done is considered in the evaluation.
- If you are integrating your own software, make sure to clearly explain what it is/does. Evaluators won't be searching for additional info.
